

United Way of Susquehanna March 2014—The purpose of this study is to identify the possible causes of poverty, low education performance and attainment, and health issues in order to improve student performance in school, reduce poverty, and improve community health.

United Way of Wyoming Valley August 2013 — The purpose of this research and planning was to identify the most significant issues in the UWWV region and their root causes. As a result of the data collection and analysis, the UWWV will adopt strategic priorities and solutions to address the region’s most pressing issues by tackling their underlying causes.

Luzerne County Diversity Task Force-Diversity-Best Practices April 2008 — Completed for a county task force on diversity. Review of six sigma organizations who currently have diversity practices in place, and interviews with representatives from local business and industry, higher education, healthcare, and nonprofits to determine their current practices. Provided recommendations and an implementation plan for county government.

Greater Wilkes-Barre Chamber of Commerce Strategic Plan February 2008 — An evaluation of the demographics, real estate offerings, and quality of life changes in Luzerne County from 1980—present. Analysis of data was conducted to identify trends, and as a result of those trends, make specific recommendations for a course of action to improve the local economy.

Volunteers In Medicine (VIM) Business Plan June 2005 — A strategic business development plan was created to guide the clinic founders from concept to operating a complete primary clinic for the uninsured and underinsured working poor in Luzerne County.
