The Wright Center, University of Scranton, and Wilkes University

There is still time to join our growing list of 2018 sponsors! If you love the region and value having up-to-date regional research and data, we hope that you will consider becoming an Institute sponsor.

For more information, contact Susan Magnotta. [Click here.](#)

A Very Special Thank You to Classic Properties!

We would like to extend sincere thanks to Steve Farrell from Classic Properties for becoming a research sponsor. Steve is also a valued member of our Housing Task Force team. We would like to thank him for his generous contribution of time and for financially supporting Institute research.

Indicators Preview

Be In the Know!

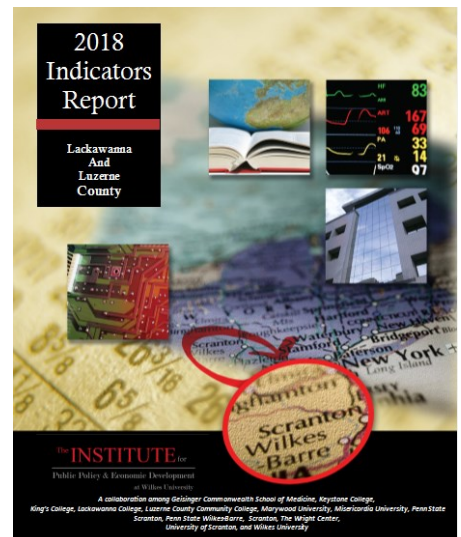

The Indicators Forum is held each year in May to share critical regional data and research with the community. The program serves as an active data-base measuring progress over time on the economic, healthcare, environmental, education and infrastructure measures affecting our region. Dialogue resulting from past Indicator events has been a driving force behind many important economic development and community revitalization projects that have produced positive outcomes for our region and its residents.

[Register Here](#)

Indicators Forum 2018

The Indicators program is two-fold, beginning with the presentation of the [Lackawanna & Luzerne County Indicators Report](#), which tracks regional data and trends and provides reliable measurements of the driving forces that contribute to community and economic vitality. The project measures progress on key economic, social and quality of life benchmarks.

The report identifies trends to watch, both positive and negative that may impact the region's future. It provides an opportunity for the region to actively intervene with new initiatives to shape the two counties collective future.

While such reports are used for many purposes, most importantly, they educate the community and provide awareness to foster better strategic planning, goal setting and policy development.

The project's purpose also includes building consensus by regional leadership on which indicators are considered high priority and capturing new measures to ensure future success.

Task Force Presentations

Each year, task force teams comprised of diverse groups of professionals in respective fields convene and generate strategies, plans, and policy solutions based on research to help improve the quality of life and standard of living in the region.

Task Force Topics 2018

Jobs, Economy & Economic Development:

A study of the “unbanked and under-banked,” or those who do not use traditional banking services such as a checking or saving account and how this affects the regional economy.

Education & Workforce Development:

Research study on the region’s high priority occupations and workforce development challenges for some of the fastest growing occupations in the region.

Health & Healthcare:

Studies on the social determinants of health and health education and literacy. Presentation will include information on health education and literacy and their impact on health status, community well-being, health care costs and healthy behaviors. There will be recommendations for evidenced based programs or initiatives aimed at improving health education, literacy levels and achieved outcomes.

Housing:

An examination of the concept of “aging in place,” which refers to older adults remaining in their homes as they advance in age, rather than making alternative living arrangements such as moving to active adult or assisted living communities.

Planning, Land Use, Transportation & Infrastructure:

Task force research will analyze local level policies that can be used to create transit -friendly communities. The study will include implementable land-use planning strategies to enhance transportation choices.

Community Based Research Initiatives

Quarterly Economic Tracker, Winter 2018

Winter 2018

Quarterly Economy Tracker

Small Business Impact: Vital Contributions to Regional Economy

In This Issue:

- Small Business Size 1-3
- Insurance Marketplace 3
- Inequality 3
- Cost of Living Index 4

The region’s economic data and trends you need to know.

Public Policy Student Poll, Fall 2017

ain insight into what almost 2,000 college students feel about the direction of the country, public policy and how they are engaging with their communities through volunteerism.

- Most students feel the country is headed in the wrong direction but are unsure about the state of the Commonwealth.
- Compared to prior years, students feel less strongly about taxes, jobs, the economy and the efficiency of government.
- The public policy issues they find most important are the cost of college education (63%), healthcare (55%), jobs and economy (55%) and terrorism (50%).
- Most students have engaged in volunteer activities at least once, with only 16 percent having no experience volunteering at an off-campus non-profit organization.
